

Pneumatic Tyre, Engine Powered **FORTIS** Line

H1.5-3.5TX Series

STRONG PARTNERS. TOUGH TRUCKS.

FORTIS™ HARDEST WORKING TRUCKS FROM HYSTER

HYSTER – PROVIDES STRONG SUPPORT, BUILDS TOUGH TRUCKS AND DELIVERS LOW COST OF OWNERSHIP

Designed for the toughest, most challenging jobs, the new FORTIS Lift Truck is the most reliable Hyster ever. Depend on it!

ASSURED HYSTER QUALITY

The Hyster Fortis was designed by our Global Development Team to meet the specific requirements of our Asia-Pacific customers. This process involved the best in virtual, bench and field testing to ensure the final product met the high quality standards demanded. The Fortis is manufactured to ISO standards at our state-of-the-art manufacturing plant in Obu, Japan.

As you would expect from Hyster, the finished product boasts the following benefits:

- Greater Reliability
- Lower Cost of Ownership
- Enhanced Productivity and Superior Ergonomics
- Simplified Serviceability and Extraordinary Support

Each of these advancements demonstrates Hyster's commitment to be a strong partner and provide the toughest trucks for even the most challenging applications.

Hyster Global Development Facilities are located in:

- Obu, Japan
- Portland, Oregon, USA
- Greenville, North Carolina, USA
- Nijmegen, The Netherlands
- Masate, Italy
- Modena, Italy

HYSTER FORTIS™ FEATURES

The new Fortis series of lift trucks features industry leading innovations that deliver what matters most: **RELIABILITY, DEPENDABILITY AND LOW COST OF OWNERSHIP.**

Operator Compartment

Ergonomically designed, fatigue reducing operator compartment enhances overall productivity. Features include: easy access step, 30% more foot space, fully adjustable seat & steering wheel, well positioned foot pedals, insulated engine cover and optional low effort TouchPoint™ E-hydraulic control levers.

Advanced Dash Display

A monochrome LCD displays all status – mounted on the steer column for easy operator viewing.

Hydraulic Controls

Three configurations hydraulic controls are offered; cowl-mounted levers for conventional operation, TouchPoint™ arm-rest mounted, electronically controlled mini-levers for low effort, precise hydraulic control, and TouchPoint™ Plus for automatic throttle up for even greater fuel efficiency and enhanced operator productivity.

EZXchange™ Bracket

Allows for simple, quick exchange of LPG cylinder and saves operator back strain.

Counterweight

The superior design channels a significant increase in airflow to optimise cooling, even in extreme temperatures and environments.

Engine Cover

The tough engine cover is hinged at the rear, offering excellent service access to the engine compartment.

Hyster Stability Mechanism™

The new stability system reduces truck sway during turns, improving lateral stability. This innovative design allows for confident travel over uneven surfaces.

Hydrostatic Steer Axle

Maximum durability, increased steer angle and steering control for easy manoeuvring and lower maintenance. New steer knob synchroniser system returns the steer knob to the same position when travelling in a straight line – improves operator comfort and control.

Drivetrain Mounting

The Hyster Fortis offers fully isolated drivetrain and delivers a new standard in smooth riding.

Removable Floor Plate

One piece, steel floor plate removes for easy service access. A thick moulded rubber mat reduces noise and vibration.

Heavy-duty Drive Axle

The full floating drive axle enhances dependability and reliability for a longer service life. Hyster premium self-adjusting brakes provide excellent inching and stopping power.

Exclusive Vista® Mast

The new range of Vista® masts are wider for improved forward visibility. The masts are now J-hook mounted for less wear and easier maintenance compared to conventional trunnion mounting. The optional return-to-level function further improves productivity by easily returning mast tilt to vertical, for load lifting and lowering operations.

Tilt Steer Column

The infinitely adjustable tilt steer column allows operators to easily obtain a comfortable driving position. The 300 mm diameter steering wheel is offset to the left for even greater driver comfort.

Hassle-Free Hydraulics

Leak-free O-ring seals maximise uptime. In-tank hydraulic filter for cleaner fluid, longer life componentry.

Integral Sideshift

The optional Hyster-designed integral sideshift provides excellent visibility and affords greater capacities than carriage-mounted sideshifts.

GREATER RELIABILITY

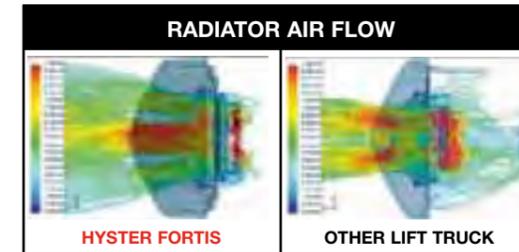

DEPENDABLE PERFORMANCE FROM HYSTER

Decrease downtime by up to 30%

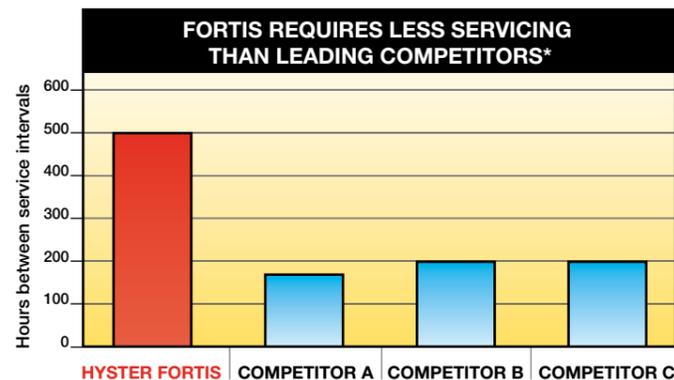

Downtime is generally the result of problems with the powertrain, electrics or the cooling and hydraulic system. Careful attention to design in these areas has reduced Fortis™ downtime by up to 30%.

- The tough drivetrain is monitored and protected by the truck management module to prevent problems before they occur.
- The new transmission is 15% stronger.
- The industry's best radiator cooling packages.
- O-ring seal fittings reduce leaks.
- Rugged IP65 electrical connectors keep out water and dust.

Significant savings in operating costs per lift truck, per year

The total cost of ownership over the life of the truck can be up to 5 times the acquisition price.

Lower Maintenance Costs

- Easy service access reduces maintenance time.
- Service intervals for planned maintenance has been extended to 500 hours for Diesel engines and 300 hours for Gas/LPG engines.
- Coolant and hydraulic fluid changes have been extended to 4,000 hours for Diesel engines and 3,900 hours for Gas/LPG engines.

Exceptional Fuel Economy

- High performance, fuel efficient Yanmar Diesel and Mazda LPG / Petrol engines with advanced combustion technology reducing fuel consumption.

*Source: Competitor's published Operator Manuals

Reducing Damage Costs

- Fortis is fitted with shields to prevent damage to components such as lights, indicators, lamps and beacons. Engine cover and mudguards are made of steel, for greater resistance to minor collisions.
- Overhead guard is a bolt-on design that it is easily and inexpensively replaced in the event of damage.

LOWER COST OF OWNERSHIP

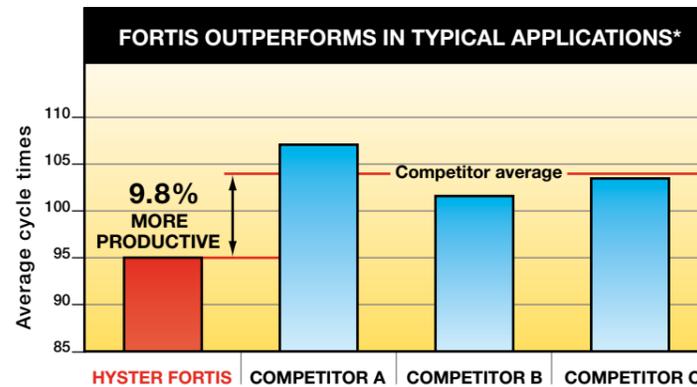

HYSTER FORTIS KEEPS TOTAL OPERATING COSTS LOW

ENHANCED PRODUCTIVITY AND SUPERIOR ERGONOMICS

Move more load per shift while reducing operator fatigue

Move more loads in less time. The Hyster H1.5-3.5TX Fortis™ series leads the industry in productivity. Significant savings in materials handling costs through reduced fleet size, labour expenses and operator overtime.

*Source: SN Development Centre, Obu, Japan.

- High performance powerful Yanmar Diesel and Mazda LPG / Petrol engines provides faster acceleration, quicker work cycles and greater productivity.
- Optimally designed mast hydraulics allows increased lift and lower speeds.
- Superior ergonomic design provides greater operator comfort and less fatigue.
- With the industry's best cooling, the Fortis will continue to perform when others have stopped.
- These features make the Fortis truck 9.8% more productive than key competitors. Optional features such as TouchPoint™ E-hydraulic controls increase productivity even further!

Comprehensive support is provided by the extensive and experienced Hyster dealer network

The new Fortis series of lift trucks has been designed as the quickest and easiest to service. The result is increased uptime and greater productivity.

Furthermore, Hyster is committed to delivering extraordinary aftermarket support to ensure that Hyster trucks continue to get the job done.

Superior Serviceability

- One piece, removable floor plate for quick and easy daily inspections.
- Easy service access reduces maintenance time.
- Extended service intervals means significantly reduced periodic maintenance requirements.

Extraordinary Aftermarket Support

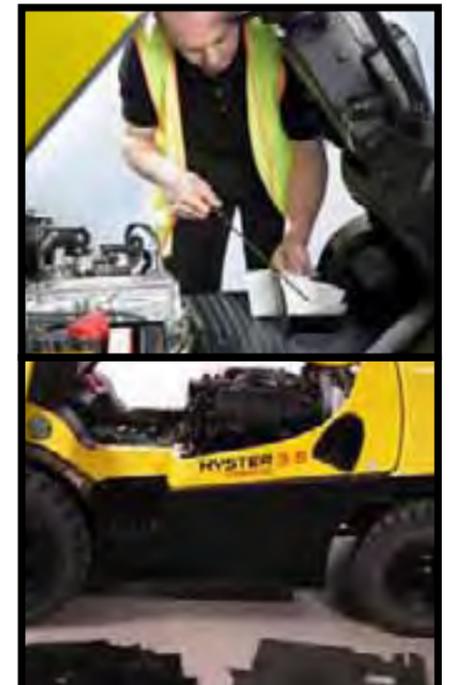

- Over half-a-million stocked components.
- 100% availability of all listed recommended spare parts.
- Emergency air-freight priority parts shipment for truck down situations.

Comprehensive Warranty

- One year / 2,000 hours
- Extended warranty packages available.

Strong, Experienced and Extensive Hyster Dealer Network

- Over 35 dealer locations throughout Asia-Pacific.
- Dealers with an average of over 20 years materials handling experience.
- Over 500 factory trained service technicians.

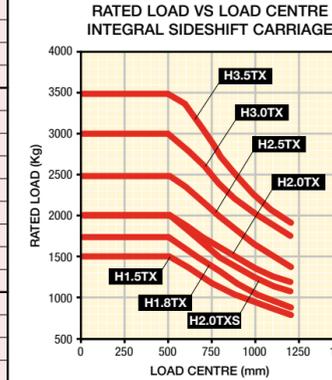

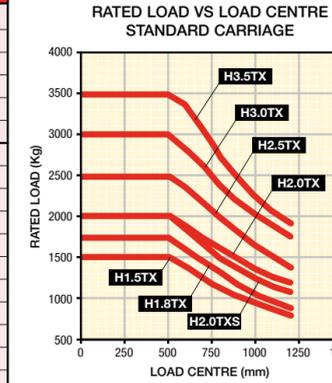

SIMPLIFIED SERVICEABILITY AND EXTRAORDINARY SUPPORT

STANDARD FEATURES AND OPTIONS

Fortis Standard Equipment

Complete truck equipped with:

- 2-Stage limited free lift Vista® mast with lift height of 3,000 mm
- Hook-type carriage with 1070 mm high load backrest (LBR)
- 920 mm long forks (H1.5-1.8TX, H2.0TXS)
- 1,070 mm long forks (H2.0-3.5TX)
- Yanmar 2.6L Diesel or Mazda 2.0L Petrol / LPG engine (H1.5-1.8TX, H2.0TXS, H2.0-2.5TX)
- Yanmar 3.3L Diesel or Mazda 2.2L Petrol / LPG engine (H3.0-3.5TX, optional for H2.0-2.5TX)
- Powershift transmission

HYSTER'S "STRONG PARTNER" COMMITMENT

Because even the toughest truck requires servicing, Hyster is committed to being a strong partner to ensure that our trucks continue to do what they were made for – working hard!

The Hyster "Strong Partner" Commitment:

- Supply tough, strong trucks to handle all the hard jobs while delivering low cost of ownership.
- The greatest depth and breadth of lift trucks with over 150 models from 1 to 52 ton in capacity. Engine powered or electrically driven, for yard work or warehouse applications, Hyster tough lift trucks are able to work from sub-zero freezers to furnace rooms. Hyster has them all.
- Options and choices of packages to meet the requirement of your application, no matter how hard.
- Strong experienced Hyster dealer network with well trained staff that know how to keep your truck working.
- Hyster factory staff that support our dealer network and assist them to keep your Hyster trucks operating at optimal performance.
